

Plant Monitoring System (PMS)

Data Counting, Recording, Information Processing and Management System for factories
Simple to Operate, Reliable, Economical and 'Do It Yourself type to install & maintain'

Benefits of using PMS

Quick Decisions....manage better, reduce wastage, More Profit!
See or download Demo of PMS on www.betacomp.com

Effortless
Accurate
Reliable

Counting & Automatic Recording

Production: Length in Meters
Production: Quantity in Nos.
"Machine Time counting"

Suitable for different Applications:
External sensor or External Pulses

Energy: Pulses in Kwh

Utility Consumption: Energy KWh, flow, etc.

Continuous Status Monitoring

Current Status: Hour, Shift, Day, Month, Batch

Order Status

All Machine Status 'At a Glance'

Batch Status

Statistics: Running, Stopped, offline, Disabled

Utility Consumption Status

System to Manage, Take Decisions, And Take Actions

Timely Actions

System for Decisions

System for Easy Planning

Actions on Downtime & Maintenance Decisions

Centralized Monitoring: Men, Machine Time & Production

Order wise Decisions & Multiple Order Coordination

Performance Analysis

Analysis by Hour, Shift, Day, Month

Time Efficiency

Production Efficiency

Utility Consumption Analysis

Analyze Machine Performance

Analyze Operator Performance

Instant Automatic Reporting

Periodic Reports: Hour, Shift, Day, Month

Production, Orders and Batch Reports

Selective mails on diff. IDs

Generated Reports are sent automatically by Email immediately on period completion. Diagnostic and pending mails are also sent.

Last 65 reports are stored

Download reports in CSV files

Minute wise Report for last 24 Hrs.
